

Delta Municipal and School District Weekly Field Condition Report

From Week Thursday, **March 11, 2010**

To Thursday, **March 17, 2010**

Status	Description
Open	Field is open for play
Closed	Usually issued when prolonged heavy rain saturates a grass field to the point that is unusable. Fields will be closed when, in the opinion of Parks staff, serious damage will occur if play continues on the wet surface. Other conditions, which may force closure of a grass field, would be severe freezing/thawing conditions or physical damage to the playing surface. All weather (gravel) fields are generally serviceable for longer periods but it is necessary to close them during periods of freezing and thawing of the ground particularly when frost penetration is deep or when ruts on the frozen surface will present a hazardous condition.
Discretion	This message will be made when weather conditions are unpredictable and can change significantly between Thursday afternoon and Sunday. User groups will be expected to determine the playability of the field based on their knowledge of field's performance, the number of games and ages of players they have scheduled. Some of the criteria that should be used to determine if fields are not playable are: <ul style="list-style-type: none"> • Heavy rain warning • Standing water on playing surface • Frost/frozen playing surface

For further information, please call the Field Coordinator at (604)946-3304

Field Name and Location	Status			Remarks
